

Housed cow cleanliness score card

This simple scoring system helps you to estimate the current cleanliness of your herd and your housing facility. Most cows in most herds should score 0 or 1. If you have more than 20% of your cows scoring 2, they may be at greater risk of animal health issues and milk quality may be affected. When you have scored the cows, go to dairynz.co.nz/clean-cows to find out what your herd's score indicates.

Score	Back, flank and tail	Lower hind leg	Udder
<p>0 Clean</p> <p>No dirt or less than 10% (a hand-size) is splashed with fresh or dry material.</p>			
Total number of cows with any body part scored @ 0 = <input type="text"/>	Tally <input type="text"/>	<input type="text"/>	<input type="text"/>
<p>1 Dirty</p> <p>There is at least a hand-sized area of dirt, but less than 50% of the area is dirty.</p>			
Total number of cows with any body part scored @ 1 = <input type="text"/>	Tally <input type="text"/>	<input type="text"/>	<input type="text"/>
<p>2 Very dirty</p> <p>More than 50% of the area is very dirty and hair is hard to see. Tail may have significant dagging.</p>			
Total number of cows with any body part scored @ 2 = <input type="text"/>	Tally <input type="text"/>	<input type="text"/>	<input type="text"/>
