

# 12 Month - Ryegrass Forage Value List

Evaluation date: Jan 2020

**Cultivars are sorted by star rating and then alphabetically. Note:**

- The short term ryegrasses are sown by dairy farmers for 12 month production.
- The FVI for 12 month ryegrasses is a combination of seasonal dry matter production performance and economic values only.
- WE is without endophyte or also known as nil endophyte.
- 12 month options include Hybrid and Italian ryegrasses.
